

Alpha Moderate Fund

The Alpha Moderate Fund is a broadly diversified investment strategy that typically invests across a range of asset classes, including Australian and International Fixed Interest, Cash and a small amount of Australian and International Shares, Property Securities, Infrastructure Securities and can include Alternatives. The fund's allocation of capital across these asset classes is strategic and results from Alpha's 'top down' capital markets analysis.

Alpha's investment philosophy is that higher quality securities will outperform over the long term and generally through the economic cycle. To express this investment approach the portfolio has a bias towards more profitable companies which possess and maintain sustainable competitive advantages to peers and the broader market. In the medium term, Alpha's approach remains focused on 'higher quality' assets and seeks to adapt to prevailing market conditions by rotating their exposures to different investment styles with the objective of outperforming through the market cycle. Individual security selection is implemented via a quantitative process which ranks and monitors securities based on their respective factor attributes to produce a philosophically consistent and well-diversified portfolio.

How does the fund fit in a well-balanced portfolio?

This Fund can operate as a whole of portfolio solution or be used to invest the growth asset allocation of a portfolio. It can also be partnered with a passive strategy, as it has the attributes of an active 'core' strategy being able to increase style biases when market conditions are favourable for those investment styles.

Investment Guidelines

Inception Date	9th September 2021
